

Oaks III Mailbox Improvement Project

A mailbox improvement survey was taken in January 2009. The survey results indicated several Oaks III residents were interested in upgrading their mailbox stands. A committee was formed with the members listed below. The goal of the project was to improve the appearance and uniformity to the mailbox stands in Oaks III. Estimates were gathered from three companies. Dakota Unlimited was selected as the supplier for the project. 50 homeowners purchased 22 mailbox stands and they were installed in July, 2010. In April 2013 the committee re-grouped to connect with homeowners again since many new families have moved into Oaks III. Phase II resulted in 15 homeowners with 5 new mailbox stands. These stands were installed in November 2014. Phase I and II resulted in 63% of our community participating in the Mailbox Improvement Project.
